

STEINBEIS LABEL DRY

Non-wet-strength label paper (NWS)

PRODUCT DESCRIPTION Steinbeis Label Dry is made from 100% recycled paper without the use of chlorine or bleaching agents containing chlorine in the recycled paper preparation. The label paper has been awarded the Blue Angel and the EU Ecolabel. This product can be fully recycled after use.

APPLICATIONS Steinbeis Label Dry is suitable for use in connection with all common types of labels that are applied to non-returnable cans, glassware and bottles using a wet-gluing, hot-melt bonding or self-adhesion process. Can be printed using offset, intaglio and flexographic printing techniques. It boasts outstanding curvature properties, even at high printing speeds, and it also displays excellent die-cutting properties. Steinbeis Label Dry is produced in an integrated manufacturing facility using a sustainable fibre raw material – which makes it the ecological alternative to all labels made of fresh fibre paper.
