

# STEINBEIS LABEL WET

Wet and alkali-resistant label paper (WS)

**PRODUCT DESCRIPTION** Steinbeis Label Wet is made from 100% recycled paper without the use of chlorine or bleaching agents containing chlorine in the recycled paper preparation. The label paper has been awarded the Blue Angel and the EU Ecolabel. This product can be fully recycled after use.

**APPLICATIONS** Steinbeis Label Wet is suitable for use in connection with all common types of labels that are applied to returnable beverage bottles and glass jars using a wet-gluing, hot-melt bonding or self-adhesion process. Can be printed using offset, intaglio, and flexographic printing techniques. It boasts outstanding curvature properties, even at high printing speeds, and it also displays excellent die-cutting properties when complex cutting dies are used. Steinbeis Label Wet is produced in an integrated manufacturing facility using a sustainable fibre raw material – which makes it the ecological alternative to all labels made of fresh fibre paper.

**CERTIFICATIONS** ISO 9001 (Quality Management) • ISO 14001 (Environment Management) • ISO 50001 (Energy Management) • ISO 45001 (Occupational Safety) • EMAS (European Management and Audit Scheme)
