

Environmental requirements and sustainability

We expect our suppliers to comply with essential environmental requirements and all legal requirements.

In addition, as Purchasing at Steinbeis Papier GmbH, we attach great importance to the fact that our suppliers act in an environmentally conscious manner and constantly work to operate more sustainably.

Compliance with occupational safety and environmental requirements is assessed in our annual supplier evaluation.

The purchasing department of the Steinbeis-Group is a voluntary member of the [BME Compliance Initiative](#) and recognizes the [BME Code of Conduct](#) based on the [UN Global Compact](#).

Regulations on work safety and the environment are bindingly regulated in the construction site regulations at our locations.

[Glückstadt](#)

[Papenburg](#)

Our Steinbeis self-image:

We attach great importance to environmental protection.

We are certified according to [DIN ISO 9001/14001/45001/50001](#).

Our finished products receive, among other things, the seal of approval of the [Blauer Engel and the EU Ecolabel](#). We pay attention to the ecological balance in the entire manufacturing process. We focus on maximum resource conservation, efficient energy management, innovative technologies and sustainable procurement concepts.

Together with our suppliers, we can make a big difference.

We welcome any commitment by our suppliers with regard to the environment and sustainability, for example through resource conservation, voluntary participation in sustainability or other initiatives or social commitment. We would be happy to receive further information from you.
